

Business Coaching

There are many psychological reasons why some people prefer to be active and rich and some complain about being poor. It doesn't matter what you got from your parents or who you are right now. The main question is:

What are YOU DOING with what YOU ARE?

Are you satisfied? Do you know your dreams, values and strengths?

Do you know the rules of business?

Many business schools have great programs for people who want business education. But how many of them can help you to develop your personality on the way to your dream? My experience is: if you want to achieve something that you don't have yet, you need to change yourself. This is the fast and effective way. Do you know how to do it?

The best tool available to us now is: Business Coaching. Our Business programs:

Create your Business

Business NLP (Pr.) in Russian

Enneagram for Executives

GAPS for Executives

We all inherit a model of how to earn money from our parents (and friends) but is this model helpful to you now? We have all had good and bad experiences with our economic activity. We all hold beliefs about what is right and what is wrong. How we can use our experiences to support us on the way to our goal?

Sometimes we set goals for ourselves that are based upon what is important to our family, community or society. In this case, we will rarely get satisfaction from achieving them. We can only be happy if we are in line with our own basic principles. Do you know your own values?

Our Business trainings are based on a combination of Psychology and Economy. We want to support you with effective tools which we can use on the way to your goal. Your results are very important to us.

Together we will set economic goals and targets for your Business. We will also take into account your personal leadership style, beliefs that might stop you, your values, and where to focus for maximum satisfaction.
